

**11. PASSWORD UPDATING METHOD**

PAJ 00-66-76 05189288 JP NDN- 190-0136-3016-8

**INVENTOR(S)-** TAKESHI, TONE

**PATENT APPLICATION NUMBER-** 04002338

**DATE FILED-** 1992-01-09

**PUBLICATION NUMBER-** 05189288 JP

**DOCUMENT TYPE-** A

**PUBLICATION DATE-** 1993-07-30

**INTERNATIONAL PATENT CLASS-** G06F01200; G06F01500

**APPLICANT(S)-** NEC CORP

**PUBLICATION COUNTRY-** Japan

**PURPOSE:** To provide a password updating method in which time and labor for updating a password can be saved and the generation of a changing mistake can be prevented.

**CONSTITUTION:** When a new password is inputted from a terminal 11, a first system 2(sub)1(end sub) starts a password simultaneous update job 3 after updating the password of a first user management file 1(sub)1(end sub). At this time, the password simultaneous update job 3 informs a second system 2(sub)2(end sub) of the change of the password. The second system 2(sub)2(end sub) having received the information of the change of the password retrieves a second user management file 1(sub)2(end sub) by making a user ID received from the password simultaneous update job 3 a key, and when it finds the user ID to coincide with the user ID received from the password simultaneous update job 3, it changes the password registered in the user ID into the new password.
